

Missile Defense Agency
and
Naval Research Laboratory
announce

Inaugural Battlespace Environment and Signatures Toolkit (BEST)

Users Group Meeting
September 9-10, 2002
Huntsville, AL

The purpose of this meeting is to *inform* the missile defense community of the next generation of tools to support high fidelity signature modeling and to *engage* the community in the process of defining this innovative toolkit to meet their future modeling requirements. In addition, users will have the opportunity to influence the direction of the existing suite of MDA-sponsored high-fidelity models to satisfy their near-term modeling needs. Representatives of new and existing codes will present their plans and answer questions.

Visit <https://vader.nrl.navy.mil/BEST/info/> or email meeting@vader.nrl.navy.mil for more information.
